Kenneth F. Plumb, Secretary
Federal Energy Regulatory Commission
825 North Capitol Street N.E.
Washington, D. C.

Dear Mr. Plumb:

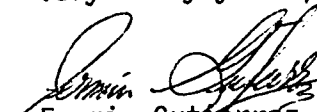

Subject: City and Borough of Sitka
Green Lake Project
FERC Project No. 2818 - Alaska

Enclosed is our response to Article 35 of the Order Issuing License for the Green Lake Project (issued April 5, 1979) as required.

In summary, the Fish Management Plan as outlined by the Alaska Department of Fish and Game and accepted by the United States Forest Service and the United States Fish and Wildlife Service requires no action until five (5) years after completion of the Project. The plan to avoid or mitigate expected adverse impacts on the wildlife resources in the project area was implemented during design and is being adhered to during project construction. Because of the advance planning, the concerned agencies have accepted the loss of some of the deer winter habitat and feel that the wildlife resource issue has been adequately addressed.

If you have any questions or require additional information, please do not hesitate to contact us.

Very truly yours,

Fermin Gutierrez
Administrator
